Aims & Scope

Model Assisted Statistics and Applications is a peer reviewed international Journal. 'Model Assisted Statistics' means an improvement of inference and analysis by use of correlated information, or an underlying theoretical or design model. This might be the design, adjustment, estimation, or analytical phase of statistical project. This information may be survey generated or coming from an independent source. Original papers in the field of sampling theory, econometrics, time-series, design of experiments and multivariate analysis will be preferred. Papers of both applied and theoretical topics are acceptable.

Abstracted / Indexed in
Mathematical Reviews, MathSciNet, Zentralblatt MATH.

Submission of Papers
Information can be obtained from: editorial@iospress.nl

Subscription Information
Model Assisted Statistics and Applications (ISSN: 1574-1699) will be published in 1 volume of 4 issues in 2007 (Volume 1).

Regular subscription price:
e261 / US$314 (including postage and handling)
All print subscriptions include full electronic access. Open URL and issue level linking are fully supported.

Personal subscription rate (electronic access):
Visit www.iospress.nl for information.

Contact IOS Press for information regarding access to back volumes and purchasing individual articles.
For more information, please visit our website at www.iospress.com or contact us by email at market@iospress.com.

Editorial Board

Editor-in-Chief
Sarjinder Singh
Department of Statistics, St. Cloud State University
St. Cloud, MN 56301, USA and
Managing Editor: Stephen Horn, Australia

Co-Editor
Marcin Kozak
Department of Biometry, Warsaw Agricultural University
Nowoursynowska 159, 02-776 Warsaw, Poland

Treasurer
Sylvia R. Valdes, USA

Associate Editors
Sampling
R. Arnab, South Africa; M.L. Bansal, India; J.M. Kim, USA; S.S. Osahan, USA; S.R. Puertas, Spain; H.P. Singh, India; G. Zou, China

Econometrics
B.R. Garg, India; Maxwell L. King, Australia

Time Series
B. Gill, USA; S.K. Singla, India

Design of Experiments
M. Khoshnevisan, Australia; M.S. Virk, India

Multivariate Analysis
A.H. Joarder, Saudi Arabia

Special Topics
Applications and Simulations
Ross Corkrey, Australia; Balbinder Deo, Canada; Munir Mahmood, Australia; Leonard C. Onyiah, USA; P. Ramalingam, USA; Tejwant Singh, India; Sylvia R. Valdes, USA

Assistant Editor
Michael Scheltgen, Canada

Editorial Board Members
Prem Chandra (India), Inderjeet Grewal (India), Pranesh Kumar (Canada), Gi-Sung Lee (Korea), Ki-Hak Hong (Korea), N.S. Mangat (Canada), S.S. Sidhu (India), Jaswinder Singh (USA), Chang-Kyoon Son (Korea), L.N. Upadhyaya (India), Med Ram Verma (India), Zaizai Yan (China)

Content of Model Assisted Statistics and Applications

Recent Contents Volume 1, Number 2 (2005-2006)

Foreword
The computational efficiency of outlier estimates for different generating process / D.K. Shangodoyin and R. Arnab

On balancing in repeated measurements designs / M.S. Virk and A.K. Mahal

Imputation for missing data and variance estimation when auxiliary information is incomplete / L. Liu, Y. Tu, Y. Li and G. Zou

Does the choice of link function matter in response propensity modelling? / S. Laaksonen

Numerical problems connected with accuracy of variance estimation / M. Kozak, J. Paderewski and A. Zebeliński

On cumulated mean income curve / S. Arora, K. Jain and S. Pundir

The effect on survival of early detection of breast cancer in South Australia / G.M. Tallis, P. Leppard and T.J. O’Neill

Ratio method of estimation of population proportion using randomized response technique / Z. Yan

On the power of Sen-Mathur test statistic / S.K. Mathur and X. Wang
Techniques for analyzing statistical data in isolation may not be efficient when applied to connected, linked, overlapping or contaminated data sources, and to problems of inference from populations surveying; evaluation studies; biological modeling; finance systems and industrial control. (Sarjinder Singh)
